

CONTENTS

Preface	vi
1. Introduction	1
2. A Cubik Orientation	3
Cubies and Cubicles	3
Orientation Based On the Center Facelets.	8
Notation For Abbreviations	11
3. Restoring the Cube	20
The Down-Face Edge Cubies	25
Three Down-Face Corner Cubies.	30
Three Middle-Layer Edge Cubies	35
The Remaining Five Edge Cubies	36
Placing the Final Corners	45
Untwisting the Final Corners	51
Cubik Games	58
4. The What, Why, and How of Cube Movements	60
Processes and Permutations	61
Equivalent Processes	68
Identities and Inverses	69
Cyclic Order of a Permutation	72
Finding Useful Processes	75
Commutativity and Commutators	77
Conjugates: Building New Processes from Old	82

5. Improved Restoration Processes	87
The Down-Face Edges	87
Three Down-Face Corners	88
Middle-Layer Edges	90
Final Up-Face Edges	90
Restoring Corners Untwisted	92
Conjugates Help Orient the Final Corners	93
Untwisting Corners	96
6. The Cube Group and Subgroups	98
The Permutations of the Cube Form a Group	99
Generators of a Group	101
The Two-Squares Group	104
The Slice Group	105
The Two-Generator Group	108
Other Subgroups of the Cube	108
The Supergroup and Other Larger Groups	113
7. Permutation Structures & the Order of Groups	116
Permutations Are Odd or Even	116
Parity of Permutations on the Cube	118
The Parity of Flips and Twists	121
The Order of the Cube Group	125
The Order of the Two-Generator Group	127
The Orders of Other Groups	129
8. Advanced Restoration Methods	132
Nested Subgroups	132
Cosets of Subgroups	136
Normal Subgroups and Isomorphisms	140
9. Epilogue	147
A. A Small Catalogue of Processes	149
B. Solutions to Exercises	155
Index	177
